Available at Android Market

Available on the App Store

WHAT IS?

CLIFFORD SMARTSTART™ GPS

SmartStart GPS lets you locate and control your car from almost anywhere. Set your phone to alert you if your vehicle visits certain areas, find your car in a parking lot, or set a speed limit alert. We've added a host of great new features previously unavailable in any single app, such as vehicle locator, social check in, speed alert and lockdown alert. You can even set a SmartFence or HotSpot alert that will notify you when your car leaves or enters a designated zone.

BECAUSE YOUR CAR NEEDS FRIENDS TOO!

SMARTSTART GPS BASIC SERVICE PLAN:

The following features are included in the SmartStart GPS Basic Service Plan. The Clifford SmartStart VSM250 can be installed stand-alone or in conjunction with any compatible Cliffordsystem.

Know Where Your Vehicle Is at All Times

The user can press a button on their smartphone and receive the vehicle's current location – plus speed if it's moving.

Connected Lifestyle

Tell your Facebook friends where you're parked? Use one-touch check-in, plus customizable messaging to update your social networking sites.

Protect Your Family

With Speed Alert, receive a notification when a family vehicle exceeds your specified setting.

Protect Your Vehicles

Secure your vehicle with a lockdown alert and receive notification if your vehicle leaves that spot.

SMARTSTART GPS PREMIUM SERVICE PLAN:

The following additional features are included with the Premium Service Plan

SmartFence

Create a secure zone around your vehicle and be alerted when your vehicle leaves the zone.

Hot Spot

Add a virtual fence around selected locations and be alerted if your vehicle goes there.

Curfew

The Curfew feature restricts the speed alert and movement settings to the day and time you select.

SECURITY AND REMOTE START SYSTEMS

Clifford leads the industry in award-winning security & remote start systems with innovative, installer-friendly features designed to boost your margins in the tech bay, including patented Virtual Tach, D2D and XPRESSPORT™, Control Center, Manual Transmission mode, onboard shock sensor, onboard remote start relays and Flex Relays! Plus consumer-friendly features including TempCheck, Remote Start reset, and range your customers can count on every time. That's what makes Clifford the security & remote start leader!

REMOTE START SYSTEMS

Clifford remote starts millions of vehicles - including manual shift vehicles – and Clifford systems have the very latest digital OEM integration technologies built in! Most include the Innovations Award-winning Xpressport, which allows a bypass & interface to make a direct digital connection to the CPU.

What is G5?

G5 is the revolutionary Fifth Generation in The Science of Security: the first major vehicle security advancement of the 21st century. These are the five generations of Clifford security products that defined an industry:

G1: First remote controlled security systems.

G2: Anti-false alarm technology and the first programmable alarm.

G3: First coded valet/override switch and the first anti-code grabbing encryption algorithm to defeat thieves' remote control cloning devices.

G4: A major leap forward in vehicle security technology, with ingenious advancements that left thieves years behind (or behind bars!) Including the CliffNet digital network between system components and accessories, and the first CliffNet Wizard®.

G5: The most advanced, reliable and uncompromising Clifford systems ever built.

- The legendary CliffNet Wizard is Windows 2000 and XP Compatible
- The Entire G5 line features the most advanced superheterodyne receiver available for optimum range.
- Concept and IntelliGuard models feature the Smart Secure Immobilizer circuit, which eliminates the possibility of stranding the vehicle due to a power failure.
- New Bright Blue Status LED lets thieves know that Clifford G5 is on board.
- Each auxiliary output channel has its own dedicated timer.
- G5 systems feature Normally Closed trigger input for rear defoggers and vehicles with closed loop triggers/externally mounted accessories.
- Five selectable auxiliary output options: Pulse 1 = ignition off only; Pulse 2 = ignition on or off; Timer; Latched; Latched reset when ignition is turned on.
- FACT2 technology allows three alarm triggers before silencing the offending input for heightened security.
- Remote sensor bypass from the transmitter of all warn zones only or all warn and trigger zones anytime the alarm is armed. No time limit to bypass.
- All Concept and Intelliguard systems are compatible with G5 remotely adjustable sensors.
- Auxiliary channel auto activate: Selectable for Off/Arm/Disarm/Arm & disarm.

G5 ACCESSORIES

State-of-the-Art Clifford Accessories are G5 Compatible! Great news about G5 - Clifford has engineered the next generation of technological innovation in vehicle security to be backwards compatible. The core of G5 is CliffNet™, the revolutionary digital link between every Clifford component and major accessory. With CliffNet, each piece in the system is "daisychained" together to offer the highest degree of sophistication, compatibility and reliability, so you can add the following accessories to your G5 system to create the ultimate in security, luxury and convenience.

SmartWindows™ (p/n 903010)

More Power to Power Windows. Open, close and vent the car's power windows using the G5 security system remote control. SmartWindows also adds extra features inside the vehicle: one tap fully open, one tap fully closed. Tap the switch during roll-up and roll-down to instantly stop the window. Vent opening is selectable via the CliffNet Wizard, and can be vented repeatedly after remote arming. The SmartWindows Safety Stop feature halts window movement if there is an obstruction.

BlackJax™5 (p/n 909505)

Carjacking Response & Vehicle Recovery System. BlackJax is Clifford's unique anti-carjacking response system that puts personal safety first while using innovative advancements to ensure that users can recover the vehicle themselves. If an armed car thief approaches - whether at a stop light or in a parking lot (where most carjackings occur) - immediately turn over the keys and remote and let Clifford technology take over.

Fully automatic: No buttons or transmitters to push when a gun is involved. Just get away from the vehicle. Quick response: BlackJax allows the criminal to drive away a safe distance. Then, a few seconds later, BlackJax blares the siren and flashes the lights to alert other drivers and witnesses. It then pulses down the ignition system to safely force the vehicle to slow to a complete stop. Siren blaring and lights flashing, unable to restart the engine, the carjacker has no choice but to abandon the vehicle.

Immediate vehicle self-recovery: With the vehicle immobilized a short distance away, the owner can recover it. No special tracking units, monthly fees or per-use charges. Just follow the sound of the BlackJax siren, then enter the PIN code. That's it - it's sabotage-proof. The only way to turn off BlackJax is with a secret user-selectable PIN code. If the carjacker tries guessing codes at random, BlackJax actively ignores his code entries for the next few minutes. Even if he were to find and remove the BlackJax control unit, he would still be unable to restart the engine. That's Clifford technology you can count on.

The G5 line features the most advanced superhetero-dyne receiver available for optimum range and an all new bright blue LED!

SmartWindows
(p/n 903010)

BlackJax5
(p/n 909505)

G5 ACCESSORIES

The innovation and technology that makes these systems so intimidating to thieves is also what makes them so convenient for users. Access up to 16 functions with the press of a button on the remote for literally instant command of an awesome array of security and lifestyle-enhancing features, including remote engine start, remote control trunk release, headlight automation and window auto close.* G5 from Clifford is quite simply the state of the art.

High-Tech Sensors

Extra Sensory Protection. Clifford's ground breaking thinking has also gone into making the ultimate smart sensing technology enhancements.

Digital Tilt Motion Sensor (p/n 507M)

Detects even minor lifting or rolling of the vehicle without any of the false alarms common to all other tilt and motion sensors. Advanced design allows maximum stability in extreme conditions. Motion can be turned off for tilt only sensing. A must for vehicles with upgraded wheels and tires. Automatically self-adjusting

Digital Dual Zone Proximity Sensor p/n 905311

This digital signal processing (DSP) radar sensor's outer perimeter warning zone provides an invisible shield up to a foot outside the closed windows and convertible top. The interior zone instantly blasts the full alarm if someone leans into the passenger compartment. Especially recommended for convertibles and other soft-sided or open vehicles.

Glass Tamper Sensor p/n 506T

Glass Tamper Sensor identifies the sound of glass breaking attempts, and differentiates them from common noises that false alarm other glass sensors. The G5 Glass Tamper Sensor even detects glass punch devices that quietly shatter windows without impact or vibration.

Ultrasonic Sensor (p/n 509U)

The 509U Ultrasonic Sensor is used to provide coverage of a vehicle's interior cabin area. The sensor detects movement inside the vehicle by sensing air disturbance.They should trigger the alarm if a thief has gained access to the interior of your vehicle.

Smart Self-Powered Siren (p/n 515C)

Thieves' Worst Enemy. The world's most advanced and dependable siren for G5 systems. Its built-in battery allows this siren to keep on wailing even if the wires are cut! And its G5 Digital ComLink will detect wire tampering that thieves use to bypass other battery-backed sirens. Its smart charging system won't drain your car battery like other sirens of this type. It will even warn you if the internal battery charge is very low. No override keys are needed like other such sirens. Provides Personalized Siren Sounds even on Clifford G5 security systems lacking that feature (selecting from among 15 different sounds via CliffNet Wizard.)

* Additional parts and labor may be required.
